

WOCA Wood Cleaner

- for the basic cleaning of unfinished and treated wood surfaces, regardless of the basic finish

Preparing today for tomorrow

- For untreated, oiled or soaped indoor woodwork
- Basic cleaning and grease removing
- High efficiency
- Certified by IBR

Product info

Container: 1 l and 2,5 l

Consumption: 200-300 m²/l depending on the surface

Application area

Wood Cleaner is used for the cleaning of oiled surfaces indoors. Wood Cleaner is also used for the cleaning prior to a basic finish with oil or soap and prior to a treatment with lye.

Result

Wood Cleaner has a high grease removing effect and dissolves e.g. old soapfilm, grease and dirt, whereas oil is not affected.

Application

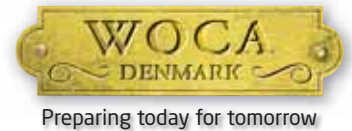

Mix 125 ml Wood Cleaner with 5 l lukewarm water. Apply with mop or machine.

After care

Soaped floors with Natural Soap. Oiled floors with Maintenance Paste or Maintenance Oil.

How to do...

- WOCA Wood Cleaner: for the basic cleaning of unfinished and treated wood surfaces, regardless of the basic finish

Tools

2 plastic buckets, mop, polishing pad, floor cloth or - the like.

Clean tools with water and soap.

Wood Cleaner may be used for the cleaning of lye treated, soaped, oiled, waxed and lacquered surfaces. Furthermore, it is well suited for cleaning of unfinished wall- and ceiling panels, furniture etc. Removes grease, dirt and soap residues.

- 1 Mix 125 ml Wood Cleaner into 5 l of lukewarm water. Wipe surface with solution with hard wrung cloth.
- 2 Always wipe a second time to minimise the exposure of water to the surface. Repeat operation if necessary.

Tip: Always work with two buckets in cases of large areas - one with Wood Cleaner mix with water and one with rinse clear water.
